

ELECTRIC AIR HEATER

B18 EPR

FUNCTIONING PRINCIPLES

The device works on the principle of forced convection. The air flow is forced fan. Cold air is drawn in the back of the unit. Further, flowing from the heater, receives heat. The heated air is expelled in front of the heater. The unit is equipped with thermal protection with reset. The unit features: ventilation, heating with half the power, heating at full power. Device has cooling thermostat.

TECHNICAL DATA

Max capacity	kW	18	Power supply	V	400V
	Kcal/h	15487		Frequency	Hz
	Btu/h	61418		Rated current	A
Combustible	Power				
Net weight	Kg	27,5			
Gross weight	Kg	29,3			
Noisy level	dBa	73			
Air displacement	m ³ /h	1700			

PACKING

Dimensions packing	mm	600x400x460
Dimensions utilization	mm	700x490x530
Pieces for Euro-pallet	n°	16
Pieces per truck 80m ³	n°	528

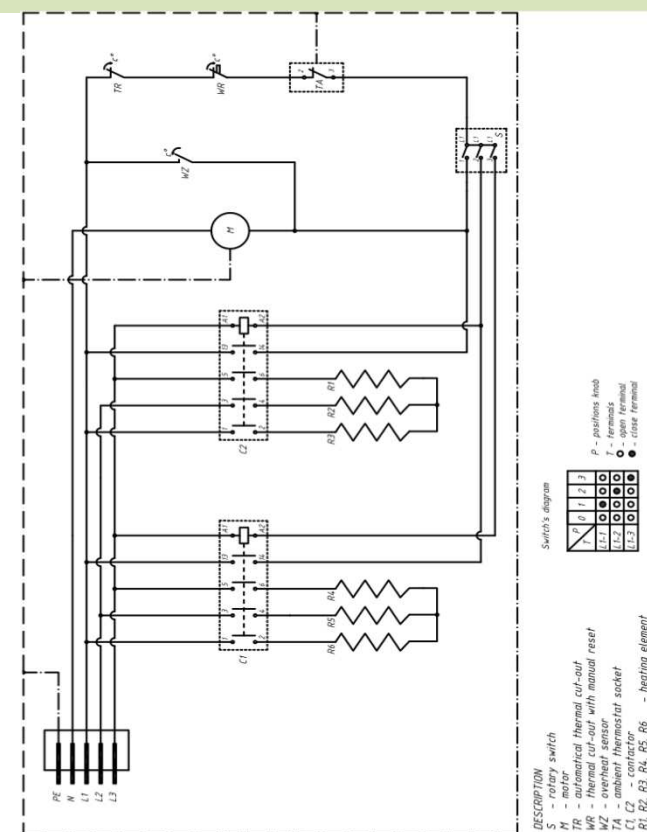

COMPONENTS

Heating elements	3000W
Temperature limiter	With capillary
Fan	Ø 300mm
Thermal protection	80°C
Cooling Thermostat	60°C
Connector thermostat	TH5
Contactor	4kW
Motor	Asynchronous, monophasic, with thermal protection, counterclockwise rotation, 2300rpm

ACCESSORIES

Room thermostat	Thermostat TH5
Supply conductor	5m
Supply conductor	10m
Hot air hoses	Hoses Ø 305
